

Good Morning, Bea.

I hope this finds you well. Please share this correspondence with Planning and Zoning Board.

Tarpon Tower Balloon Test did a test yesterday, 7/29/20 at 11am. No notice was given to residents. I was in my office and saw the balloon out my window.

Below are some images of the Tarpon Towers balloon test done at 150 feet and if approved they'll be allowed to build it to 170 feet. The second copy of the images include the proposed tower with 5 carriers (they've claimed they can have 5 carriers) at the height of the balloon test done at 150 feet with the perspective of being approximately 500 feet away.

We do not want a cell tower in our backyard. We do not want our wetlands disturbed. We do not want the birds in our backyard killed while flying into the monstrous tower. We want our Planning and Zoning boards to VOTE NO on the variance requested that will place a 170 foot cell tower with 5 carriers in our backyard 550 feet from our homes where we sleep at night on the basis that no dwelling should be closer than 750 feet to a cell tower. Please remember that our lives matter and vote NO.

I understand that Tarpon Towers has said that there aren't enough people showing up to the town meetings to dispute this tower. We're in the middle of a pandemic. Many of the residents of our neighborhood are elderly and can't come out. How many people do you need to dispute this? How many letters does Tarpon Towers want us to send to the board? Let us know what more we need to do and we'll do it.

All the best,
Carla Springer
