<u>MEMORANDUM</u>

To:

Bruce M. Flower, Chairman, and

the Town of Wappinger Planning Board

Date:

April 8, 2022

Subject:

<u>Downey Energy – 199 Old Route 9 – SEQRA</u>

Tax Lot 6156-02-763656

Received

Town of Wappinger

Town Clerk

Following the discussion at the April 4, 2022 Planning Board meeting, we have revised the following attached documents which the Planning Board adopted as amended.

- Resolution Acknowledging Lead Agency Status and Adopting a Positive Declaration.
- 2. Part 2 of Environmental Assessment Form
- 3. Positive Declaration (Part 3 of Environmental Assessment Form and Attachment).

We look forward to discussing the attached documents with you.

Sarah L. Brown, AICP Senior Planner

Malcolm M. Simpson Planner

CC:

James Horan, Esq. Barbara Roberti Jon Bodendorf, PE

Full Environmental Assessment Form Part 2 - Identification of Potential Project Impacts

	Agency Use Only [If applicable]
Project:	
Date:	

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.

Answer the question in a reasonable manner considering the scale and context of the project.

1. Impact on Land Proposed action may involve construction on, or physical alteration of, the land surface of the proposed site. (See Part 1. D.1) If "Yes", answer questions a - j. If "No", move on to Section 2.	NC		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may involve construction on land where depth to water table is less than 3 feet.	E2đ		а
b. The proposed action may involve construction on slopes of 15% or greater.	E2f		
c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.	E2a	П	
d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.	D2a	<u> </u>	
e. The proposed action may involve construction that continues for more than one year or in multiple phases.	D1e		
f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).	D2e, D2q		<u> </u>
g. The proposed action is, or may be, located within a Coastal Erosion hazard area.	Bli		, a
h. Other impacts:			

2. Impact on Geological Features The proposed action may result in the modification or destruction of, or inhib	1+		
access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g)	n ∠ NC		YES
If "Yes", answer questions a - c. If "No", move on to Section 3.			
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
			-
a. Identify the specific land form(s) attached:	E2g		
b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark. Specific feature:	Е3с	-	
c. Other impacts:		D	
	<u> </u>		l·
3. Impacts on Surface Water The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h) If "Yes", answer questions a - l. If "No", move on to Section 4.	□nc) <u>Z</u>	YES
17 105, there questions unit 2 110, more on to section 7.	Relevant	No, or	Moderate
	Part I Question(s)	small impact may occur	to large impact may occur
a. The proposed action may create a new water body.	D2b, D1h	Ø	
b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.	D2b	Z	
c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.	D2a	Z	
d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.	E2h		
e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.	D2a, D2h	Z	
f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.	D2c	Z	
g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).	D2d	Z	
h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.	D2e	Ø	
The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.	E2h		IZ I
j. The proposed action may involve the application of pesticides or herbicides in or around any water body.	D2q, E2h	Ø	
k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.	Dla, D2d	Ø	

1. Other impacts:		☑	
		l	<u> </u>
4. Impact on groundwater The proposed action may result in new or additional use of ground water, or	□NO	· Z	YES
may have the potential to introduce contaminants to ground water or an aquife (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5.	er.

a. The proposed action may require new water supply wells, or create additional demand on supplies from existing water supply wells.	D2c	. 🗅	
b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer. Cite Source:	D2c	Z	
c. The proposed action may allow or result in residential uses in areas without water and sewer services.	D1a, D2c	Z	
d. The proposed action may include or require wastewater discharged to groundwater.	D2d, E2l	Z	
e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.	D2c, E1f, E1g, E1h	Ø	
f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.	D2p, E2l		Z
g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.	E2h, D2q, E2l, D2c	Z	
h. Other impacts:		Z.	
		L	L
5. Impact on Flooding The proposed action may result in development on lands subject to flooding. (See Part 1. E.2) If "Yes", answer questions a - g. If "No", move on to Section 6.	NC) 🗆	YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in development in a designated floodway.	E2i		Ó
b. The proposed action may result in development within a 100 year floodplain.	E2j		D
c. The proposed action may result in development within a 500 year floodplain.	E2k		
d. The proposed action may result in, or require, modification of existing drainage patterns.	D2b, D2e		
e. The proposed action may change flood water flows that contribute to flooding.	D2b, E2i, E2j, E2k		0
f. If there is a dam located on the site of the proposed action, is the dam in need of repair,	Ele		

g. Other impacts:			
6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D.2.h, D.2.g)	∑ no		YES
If "Yes", answer questions a - f. If "No", move on to Section 7.			
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
 a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: i. More than 1000 tons/year of carbon dioxide (CO₂) ii. More than 3.5 tons/year of nitrous oxide (N₂O) iii. More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs) iv. More than .045 tons/year of sulfur hexafluoride (SF₆) v. More than 1000 tons/year of carbon dioxide equivalent of hydrochloroflourocarbons (HFCs) emissions vi. 43 tons/year or more of methane b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous 	D2g D2g D2g D2g D2g D2h D2h	0 0 0	0 0 0
air pollutants. c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.	D2f, D2g		
d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.	D2g		
e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.	D2s		
f. Other impacts:			
		<u> </u>	L
7. Impact on Plants and Animals The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. 1 If "Yes", answer questions a - i, If "No", move on to Section 8.	nq.)	□NO	✓ YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may cause reduction in population or loss of individuals of any threatened or endangered species, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2o	Ø	
b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.	E20		Ø
c. The proposed action may cause reduction in population, or loss of individuals, of any species of special concern or conservation need, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2p	1 7	
d. The proposed action may result in a reduction or degradation of any habitat used by any species of special concern and conservation need, as listed by New York State or the Federal government.	E2p		Ø

e. The proposed action may diminish the capacity of a registered National Natural Landmark to support the biological community it was established to protect.	E3c	[[Z]	
f. The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community. Source:	E2n	Z	
g. The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.	E2m	Ø	
h. The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat. Habitat type & information source:	E1b		
i. Proposed action (commercial, industrial or recreational projects, only) involves use of herbicides or pesticides.	D2q	I ZI	
j. Other impacts:		Z	
8. Impact on Agricultural Resources The proposed action may impact agricultural resources. (See Part 1. E.3.a. a If "Yes", answer questions a - h. If "No", move on to Section 9.	ınd b.)	NO	☐YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur

Full Environmental Assessment Form Part 3 - Evaluation of the Magnitude and Importance of Project Impacts

Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.

Determination of Significance - Type 1 and Unlisted Actions										
SEQR Status:	✓ Type 1		Unlisted							
Identify portions of EAF completed for this Project: Part 1				Part 2	 ✓ Part 3					
* A * * * * * * * * * * * * * * * * * *										

Upon review of the information recorded on this EAF, as noted, plus this additional support information
and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the The Town of Wappinger Planning Board agency that:
A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.
B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:
There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).
C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
Name of Action: Downey Energy
Name of Lead Agency: Town of Wappinger Planning Board
Name of Responsible Officer in Lead Agency: Bruce Flower
Title of Responsible Officer: Chairman
Signature of Responsible Officer in Lead Agency: Date: 4/12/22
Signature of Preparer (if different from Responsible Officer) Malcolm Simpson
For Further Information:
Contact Person: Beatrice Ogunti, Planning Board Secretary
Address: 20 Middlebush Road, Wappinger Falls, NY, 12590
Telephone Number: (845) 297-6256
E-mail: bogunti@townofwappinger.us
For Type 1 Actions and Conditioned Negative Declarations, a copy of this Notice is sent to:
Chief Executive Officer of the political subdivision in which the action will be principally located (e.g., Town / City / Village of) Other involved agencies (if any) Applicant (if any) Environmental Notice Bulletin: http://www.dec.nv.gov/enb/enb.html

POSITIVE DECLARATION DOWNEY ENERGY PROJECT

ATTACHMENT TO PART 3 OF FULL ENVIRONMENTAL ASSESSMENT FORM

Description of Action: The Town of Wappinger Planning Board has received an application from Downey Energy (the "Applicant") for Special Use Permit and Amended Site Development Plan Approvals to construct a liquid propane storage facility consisting of two 45,000-gallon buried storage tanks along with a separate utility building. The Applicant is also seeking a zoning text amendment from the Town Board to allow the proposed use in the Highway Business (HB) and Airport Industrial (AI) zoning districts for the establishment of a liquid propane storage facility (the "Proposed Action" or "Project").

SEQRA Classification: Type I Action

Location: 199 Old Route 9, Town of Wappinger, Dutchess County, and designated on the Town tax maps as 6156-02-763656 (the "Site" or "Subject Property").

Reasons Supporting This Determination: Based on the criteria outlined in Part 617.7(c) of the New York Code of Rules and Regulations (the implementing regulations of the New York State Environmental Quality Review Act) and based upon a review of the Full Environmental Assessment Form and all other application materials that have been prepared to-date, the Town of Wappinger Planning Board, as Lead Agency, has determined that the Proposed Action may have the following significant adverse impacts on the environment:

1. Criteria: The proposed action may result in new or additional use of ground water or may have the potential to introduce contaminants to ground water or an aquifer.

As specified in the Full Environmental Assessment Form, not only will the proposed action require additional use of ground water, but a substantial wetland exists adjacent to the subject property as well as flood plains and the potential habitat of the endangered Blanding's Turtle. The Planning Board believes that the potential may exist for contamination of the water table and/or wetland due to seepage and/or stormwater runoff of the accidental spillage or leakage of propane.

2. Criteria: The proposed action may result in a loss of flora or fauna.

As specified in the Full Environmental Assessment Form, a substantial wetland exists adjacent to the subject property as well as flood plains and the potential habitat of the endangered Blanding's Turtle. The Planning Board believes that the potential

may exist for contamination of the water table and/or wetland due to seepage and/or stormwater runoff of the accidental spillage or leakage of propane.

3. Criteria: The proposed action may affect one or more wetlands or other surface water bodies.

As specified in the Full Environmental Assessment Form, a substantial wetland exists adjacent to the subject property as well as flood plains and the potential habitat of the endangered Blanding's Turtle. The Planning Board believes that the potential may exist for contamination of the water table and/or wetland due to seepage and/or stormwater runoff of the accidental spillage or leakage of propane.

4. Criteria: The proposed project is inconsistent with the existing community character.

The Planning Board believes that the potential may exist for a significant impact to character and quality of existing communities associated with the zoning change proposed to allow the use of propane storage facility in the Highway Business (HB) and Airport Industrial (AI) zoning districts. The Planning Board feels that there has not been sufficient analysis of the wide-reaching implications such a zoning change could carry and that would thereby potentially cause significant adverse impairment to the character or quality of the existing community.

5. Criteria: The proposed action is not consistent with adopted land use plans.

The Planning Board believes that there may be conflict between the zoning change proposed to allow the use of propane storage facility in the Highway Business (HB) and Airport Industrial (AI) zoning districts and existing land use plans. The Planning Board feels that there has not been sufficient analysis of the wide-reaching implications such a zoning change could carry and that would thereby potentially cause significant adverse impairment to the existing land use and community plans.

6. Criteria: The proposed action may result in a change to existing transportation systems.

The Planning Board is concerned that a propane leak from the proposed site storage facility or in the transportation to or from the proposed site storage facility could cause an emergency situation that would affect the traffic on and around NYS Route 9 and require an emergency evacuation of the surrounding area. The Planning Board feels that there has not been sufficient analysis into the implications of the effects on traffic an emergency situation would cause nor has enough study been conducted to demonstrate an emergency evacuation of the surrounding area could be conducted

effectively and that would thereby potentially cause a significant adverse impact to existing transportation systems.

7. Criteria: The proposed action may have an impact on human health...

The Planning Board believes that the potential may exist for a significant emergency requiring emergency response associated with the storage of hazardous materials. Due to limited access points, the challenging topography of the Site, the lack of a municipal water supply on Site, the adequacy of the proposed water storage facility on site for the purposes of fire suppression, and the capabilities and available equipment of emergency responders, the Planning Board is concerned that an emergency would not be able to be suitably responded to and that the proposed propane storage facility would thereby potentially cause significant adverse impairment to human health by creating a potential emergency situation that could not be adequately responded to.

The above-mentioned potential impacts are not intended to represent a scope of the Draft Environmental Impact Statement, but instead describe the reasons for requiring that a DEIS be prepared for the Proposed Action. The subject matter to be addressed in the DEIS will be described in detail in the Final Scope for the DEIS to be adopted by the Town of Wappinger Planning Board.

Scoping: T	The Lead A	Agency will	conduct a	public	Scoping	Session	regarding	the	content
of the DEIS	on	, 20	022.
