## Land Subdivision Regulation Information Sheet

The Town of Wappinger Land Subdivision Regulations have been adopted by the Town Planning Board in order to guide both the procedures and design of the subdivision of lands within the Town. Copies may be reviewed and/or purchased from the Planning Board's Secretary during normal business hours.

Article I contains general provisions, including the authority to approve subdivisions, while Article II contains definitions as to what constitutes a "Subdivision."

Article II (Application Procedures); Article IV (Required Improvements and Agreements); and Article V (General Requirements for Subdivision Design) lays out the procedures and the design guideline.

This memo deals with Phase One of the general procedures, initial conference and review, as set forth Section 3.1.1, and expanded upon in Section 3.2.

In order to expedite your application and review, it is suggested that the information to be presented to the Planning Board be submitted directly to the Zoning Administrator's office three weeks (15 business days) prior to the submittal to the Board so that the Zoning Administrator may both inform the Board and review the proposal beforehand. This should allow the Board to come to an early decision on your concept.

All applications must be accompanied by the required fees in the form of certified checks, bank checks, money orders or cash. (If paying by check, please make the check payable to the "Town of Wappinger").

The submittal can be done in two of ways:

1. Mailed to the Town Hall, 20 Middlebush Road, P.O. Box 324, Wappingers Falls, NY 12590; and,
2. Delivered to the Town Hall at the above address.

The Zoning Administrator is generally in the Town Hall Monday to Friday, 8:30 AM to 4:00 PM. If you wish to discuss any aspect of your application, it is suggested that you make an appointment with the zoning secretary at (845) 297-6257, to confirm the Zoning Administrator's availability.

Applicants should be aware that the Board meets on the first and third Mondays of each month at 7:30 PM at the Town Hall.

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**PRINT FULL FORM**

*Full Environmental Assessment Form*  
*Part 3 - Evaluation of the Magnitude and Importance of Project Impacts*  
*and*  
*Determination of Significance*

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status:       Type 1                       Unlisted

Identify portions of EAF completed for this Project:  Part 1       Part 2       Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the \_\_\_\_\_ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
