

TOWN OF WAPPINGER

POOL FILL ADJUSTMENT REQUEST FORM

The Town of Wappinger is committed to water conservation and encourages customers to do their part. After significant investigation, review, and Board discussion, we have established an equitable, Town-wide fee structure. Sewer is billed based on the amount of water that passes through the water meter. To address swimming pool fills, a bill adjustment may be made. Adjustments will be considered for an initial fill during the third quarter only, new construction, and repairs. Intermittently adding water to a pool shall NOT qualify for an adjustment. The credit will be applied to the sewer portion of the bill only.

- Adjustment Requests must be submitted within thirty days from the date of the bill.
- One adjustment is permitted per twelve month period.
- Adjustments will only be considered for water usage over 1500 cubic feet and will cap at 3000 cubic feet.
- A resident must submit a copy of the building permit for new construction and a receipt or letter from the pool company for repairs.

RESIDENT INFORMATION

Resident Name: _____ Account No.: _____

Service Address: _____ Phone No.: _____
